SUMMARY

Attentive Engineer with a Certificate in Software Development and Matriculation certification. Competent in developing and testing software and hardware systems. Adept in solving technical issues and optimizing system performance. Highly skilled in Microsoft Office and Adobe Creative Suite.

SKILLS

- Expertise in software development and engineering principles, including object-oriented programming, data structures, and software architecture.
- Strong communication skills for collaborating with cross-functional teams and conveying technical concepts to both technical and non-technical stakeholders.
- Ability to work independently on projects from conception to completion.
- Proficiency in operating systems, networking, and cybersecurity fundamentals.
- Knowledge of version control systems and testing frameworks.

WORK EXPERIENCE

Internship: Cloud Computing Engineer

Company: Innovative Solutions LLC.

Period: January 2020 - Current

Responsibilities:

- Assisted in migrating legacy systems to cloud-based platforms (e.g., AWS, Azure)
- Conducted comprehensive cloud infrastructure monitoring and performance optimization
- Implemented effective cybersecurity measures and compliance protocols to safeguard cloud-based systems
- Participated in daily stand-up meetings and provided timely updates on migration projects

EDUCATION

NQF 5 Software Development Certificate, 2020

Matriculation, 2020

**Academy of Digital Arts
